

## THE BITING DOG

### UNDERSTANDING AND WORKING WITH AGGRESSIVE DOGS

One of the main problems plaguing pet dog owners in today's world is aggression. An increasing number of dogs are being re-homed, abandoned or euthanised in the name of aggression.

Often, all the problem needs is a bit of understanding, correcting at an early age and education.

Dogs need a lot of time and patience to understand them. Not many dog owners take time to understand that their pets have descended from wolves and despite being very different in shape, size and colour, they have retained about 85% of wolf behaviour patterns and have different needs and abilities to those of humans.

Research has shown that three times as many dogs are abandoned because they have behaviour problems than those that die from cancer.

Since 1996, India's leading professional canine behaviourist – Shirin Merchant has worked with dogs in India and has realised a growing need to educate and help dog owners understand the true cause of canine aggression and the simple remedies that can help correct the imbalance in the dog-human relationship.

Through this – India's only course on canine aggression, she hopes fewer dogs will be abandoned or euthanised for aggressive behaviour and there will be more happy endings for dogs and humans.
